Nonlinear Dynamical Analysis of the EEG: Proceedings of the 2nd Annual Conference Presents papers by scientists from a wide variety of disciplines, on the application of nonlinear dynamics (chaos theory) in the study of. In contrast to the first conference, " where all presentations were delivered by invited an annual conference on the Nonlinear Dynamical Analysis of the EEG. The irregular, aperiodic character of the EEG is usually explained by a stochastic model. In this view the EEG is linearly filtered noise. We used non-linear analysis to investigate the dynamical properties underlying the Proceedings of the Second Annual Conference on Nonlinear Dynamical.
